

TOUCHCHART

Digital Charting System

Digital Charting System

TouchChart Digital Charting System

In order to make a proper diagnosis, a physician must rely on signs, symptoms and patient history.

Innovative

TouchChart is a new digital charting application developed with your need to access patient history quickly and efficiently in mind. TouchChart gives you secure, easy-access to patient files anytime, from anywhere.

Versatile

TouchChart is the perfect fit for any healthcare facility. It stores both static images and streaming files.

View X-Rays, CT Scans, MRI's, Doppler flow imaging and echo cardiograms.

With up to 120 customizable tab sections, it can be tailored to meet the needs of any medical practice and integrates with most EMR's.

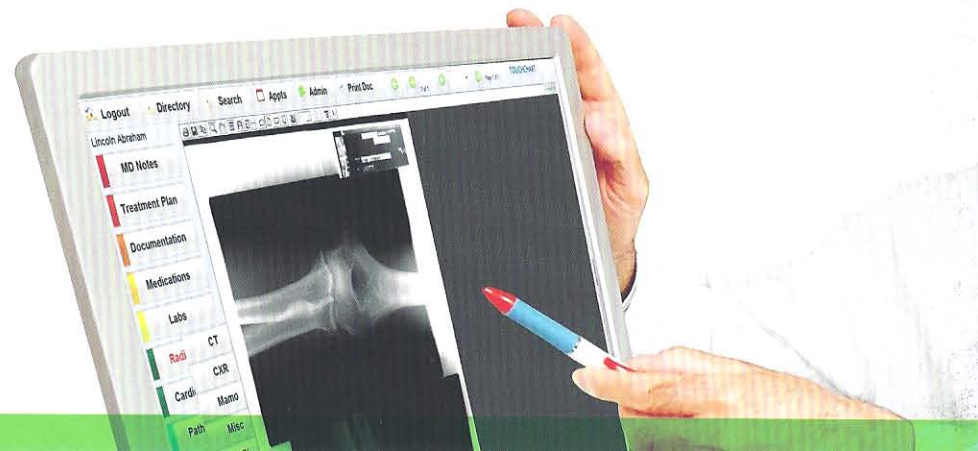

Intuitive

TouchChart is presented in an instantly recognizable and easy-to-use chart-like display. Operating TouchChart is straightforward and the best part is it enhances your workflow; it doesn't replace it.

TouchChart Makes Converting & Accessing Patient History Easy

- Intuitive touch controls
- Instantly reduce soft costs
- Comprehensively store and retrieve crucial patient data
- Barcode cover sheets simplify the scanning process
- Available in both cloud and server based

Mission

"Aquarius Imaging helps individuals and organizations bridge the gap between paper and electronic records, providing humanity with innovative software solutions."

Vision

Connecting people and technology, simplifying business solutions.

Corporation

Aquarius Imaging's team has more than 25 years experience in the document management industry. At Aquarius Imaging, saving our customers space, time and money is more than just a job—it's our passion.

We do this by providing state of the art document management software tools. Empowering each customer to gain total control of his or her documents. Aquarius Imaging's innovative software allows our customers the freedom and flexibility to find, study, and move critical documents within their company and beyond to create with greater ease for billing and collecting.

Through our practical solutions, we offer our customers opportunities to provide their customers with the best comprehensive care in the market.

Aquarius Imaging.
